# Innovative Contracts for Farmers and Nature

Reconciling the profitability of farms with environmental goals.

contracts2.0

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 818190.

## About

Contracts2.0 aims for contractual solutions that increase the motivation for farmers to provide public environmental goods and ecosystem services. To that end, Contracts2.0 works with farmers and local stakeholders in 11 *Contract Innovation Labs* (CILs) in selected case study regions across Europe.

CILs bring together practice and research partners to design and evaluate innovative contractual models using 4 approaches:

- Result-based payment schemes
- Cooperative implementations
- Land tenure-based approaches
- Value chain approaches

To complement the CILs at a more strategic level, Contracts2.0 establishes 9 *Policy Innovation Labs* (PILs), where policy stakeholders apply their knowledge and experience to provide a wider perspective and contribute to the design of innovative contracts and a conducive policy environment.
